The above changes have been made to provide proper antecedent basis for the recited components.

#### ***Reasons for allowance***

The following is an examiner's statement of reasons for allowance:

The instant invention is deemed to be directed to an unobvious improvement to a pump over U.S. Patent No. 3,825,366 which teaches a pump 10 comprising a body (not numbered), an actuating shaft 18 on which at least a first impeller 28 and a second impeller 26 are coaxially mounted, the first impeller 28 being housed in a front chamber

Art Unit: 3745

(not numbered) and said second impeller being housed in a rear chamber (not numbered), the rear chamber connected to a fluid intake duct 14 and a fluid delivery duct 16, wherein: said front chamber is delimited by said body and by an interstage body 12; said rear chamber is delimited by said interstage body 12 and by a shield (not numbered), said interstage body 12 has: two volutes (not numbered) respectively associated with the corresponding first impeller 28 and second impeller 26.

The improvement comprises a first discharge orifice associated the first volute; a second discharge orifice connecting the second volute to the delivery duct; wherein said body comprises a channel for the throughflow of fluid from said front chamber to a means for supplying the fluid to the second impeller.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
